WES LLC Consulting

Defense Industrial Base Production & Quality Advisory

ABOUT WES LLC CONSULTING

Wesley C. Asay

CEO | Defense Production & Quality Advisory

WES LLC Consulting is a veteran-owned defense advisory firm whose leadership brings more than 57 years of combined US Army acquisition leadership. Wes served as Chief of Production and Quality Management for US Army Weapons Programs and as Lead Production & Quality Manager for PEO Soldier, Program Manager Soldier Lethality, overseeing production readiness, quality compliance, and industrial base performance across small arms, suppressor, optics, and fire-control programs.

Barbara Muldowney

Senior Strategic Advisor | Defense Acquisition & Program Strategy

Ms. Muldowney brings over 39 years of US Army civilian acquisition leadership, managing individual weapons, optics, and fire-control programs from development through production and sustainment. She built and defended program budgets to Congress and translated Soldier requirements into contract language and source selection evaluations.

CORE COMPETENCIES

- Production Readiness Reviews (PRR)
- DCMA Audit Preparation & Response
- Quality Management System (QMS) Advisory
- First Article Inspection (FAI) Execution
- Schedule Recovery & Surge Production Planning
- AS9100 / ISO 9001 Compliance Advisory

- Acquisition & Capture Strategy
- Source Selection Advisory
- Program Management & Lifecycle Strategy
- Requirements-to-Contract Translation
- Program Budget Formulation & Defense

CONSULTING ENGAGEMENT TYPES

Production Risk Assessment	PRR Preparation Advisory	DCMA Audit Preparation	QMS Gap Analysis & Remediation
Fixed-price engagement. Discrete scope, clear deliverable. Identifies production and compliance gaps before they become program problems.	Milestone-based. Full preparation support for Army Production Readiness Reviews. Converts to ongoing advisory retainer post-review.	Monthly retainer. Continuous advisory for companies under active DCMA oversight or with recurring audit cycles.	Fixed-price gap analysis against AS9100/ISO 9001 and DCMA requirements — followed by a remediation retainer to close identified gaps.
